

To be the most livable town in Canada.

## Public Notice

**Reconstruction of the Lakeshore Road Bridge  
Two-way Conversion of Navy Street  
Pedestrian Crossover at Church and Navy**

December 20, 2016

We wanted to bring you up-to-date on three road projects taking place in Downtown Oakville starting in January 2017.

### **January 5, 2017 — Navy Street converts to two-way traffic**

As part of the Lakeshore Road Reconstruction and Streetscape project, Navy Street will be permanently converted to two-way traffic between Lakeshore and Rebecca/Randall streets starting January 5, 2017. Signs are posted around the area to notify drivers of the upcoming change. Our contractor has already repainted the road and will be installing new signals by the end of December in time for the January 5 start date. We anticipate it may take some time for drivers to get used to the change and we appreciate your patience.

### **January 5, 2017 — New Pedestrian Crossover at Navy and Church**

The town is installing a new pedestrian crossover device at Navy and Church (in front of Centennial Square). Several new crossovers are planned to be installed across town in 2017 starting with the Navy and Church street location. Pedestrian crossovers have specific pavement markings and crossing signs. There are three types of crossovers. The crossover at Navy and Church will have poles, flashing beacons above the signs and pedestrian push buttons. Unlike pedestrian crosswalks at traffic signal locations, at a crossover, drivers and cyclists must stop behind the yield line and wait until the pedestrian completely crosses the road before proceeding. For more details see the flyer included in this notice. More information will be posted on the town's website in the New Year.

### **Late January —Lakeshore Road Bridge Closure**

Reconstruction of the Lakeshore Road Bridge over Sixteen Mile Creek is expected to start in late January 2017 and be completed in late fall 2017. The bridge will be closed to vehicular and pedestrian traffic for the duration of the project. A detour route around the bridge will be provided via Kerr Street, Rebecca Street and Navy Street. Once complete, the new bridge will include two travel lanes and bikes lanes. There will also be a wider pedestrian sidewalk with a barrier wall to separate the sidewalk and vehicular traffic. New pedestrian railings and lookouts will be included as well as LED lighting. As part of this project, the Lakeshore Road approaches to the bridge between Navy Street and Forsythe Street will be reconstructed using the streetscape materials selected as part of the overall Lakeshore Road Reconstruction and Streetscape project.

### **For more information**

For details about these projects, please visit [oakville.ca](http://oakville.ca) and search "lakeshore reconstruction project". We will post additional information online as the projects progress. You can also contact [ServiceOakville](mailto:ServiceOakville) at 905-845-6601.
